

The T-WALL® Solution

PROJECT: **TAPPAN ZEE APPROACH**
(I-87 / I-287 RECONSTRUCTION)

LOCATION: TARRYTOWN, NY

OWNER: NYS THRUWAY AUTHORITY

DESCRIPTION: Low bearing capacity through the Talleyrand Swamp had caused considerable settlement in the existing pavement.

On this widening project T-WALL®, used with geofoam, reduced the bearing pressure. This solved the settlement problem with its attendant long-term maintenance costs.
