

The T-WALL® Solution

PROJECT: **CHRISTIANSBURG INTERCHANGE / Rt. 460**

LOCATION: *Christiansburg, Va*

OWNER: *Virginia Department of Transportation*

T-WALL®
Retaining Wall
System

Note the railroad tracks at the top of the slope.

PROJECT SIZE: 18,404 sf

DESCRIPTION: The battered T-WALL® design (1:6) in a cut situation greatly reduced the amount of excavation and select backfill required for the retaining walls on this project.

A unique braced-plywood temporary shoring system, designed by The Neel Company, helped to reduce both installation time and cost.
